

The tree nursery Lorenz von Ehren

WE LOVE TREES

LORENZ VON EHREN

THE NURSERY. SINCE 1865

Buying plants is a matter of trust

The tree nursery Lorenz von Ehren can look back over 150 years of tradition and plenty of experience. Founded in 1865 by Johannes von Ehren (1832-1906), the tree nursery has been a family business ever since.

Now the fifth generation is at the helm, with Bernhard von Ehren as managing partner, supported by the company's second managing director, Konrad Parloh.

Lorenz von Ehren is one of Europe's leading tree nurseries and a key player in the horticultural industry, both nationally and internationally.

Trees are our speciality!

Growing since 1865

Our tree nurseries in Hamburg and Bad Zwischenahn cover a total area of more than 550 hectares. The Lorenz von Ehren tree nurseries carry a complete selection of over 2000 genus, species and varieties of plants.

Bestsellers among the over 500 000 plants are: avenue and solitary trees, conifers and evergreens, hedge elements and solitary shrubs, fruit-bearing trees and topiary plants as well as multi-stem trees.

Our three sites at Hamburg (headquarters), Bad Zwischenahn (branch) and Rellingen (containers) deliver Lorenz von Ehren plants beyond the borders of Germany throughout Europe.

We fulfil your plant desires!

We sell time

A tree needs plenty of time to reach an impressive size – and who has time these days? With us you've found what you are looking for! The time factor is, alongside appropriate and professional cultivation, the most important ingredient for a Lorenz von Ehren tree. We are known for our avenue trees and large trees, which help give newly planted projects an established appearance right away.

Our oldest park trees are over 200 years old and these have been watered, fertilised and pruned countless times, as well as being transplanted every four years. The old saying that large mature trees can't be successfully moved does not apply to trees from the tree nursery Lorenz von Ehren.

For you we are happy to take over the waiting time that a large tree requires.

Tree nursery with the best grades

We know in the long term, it pays off not to make any concessions when it comes to quality. We are one of Germany's first certified tree nursery brands and we cultivate our plants according to the highest production standards. While plants are growing in our nurseries we follow the guidelines of the FLL (Research Association for Landscape Development and Landscaping) and the BdB (Federation of German Tree Nurseries).

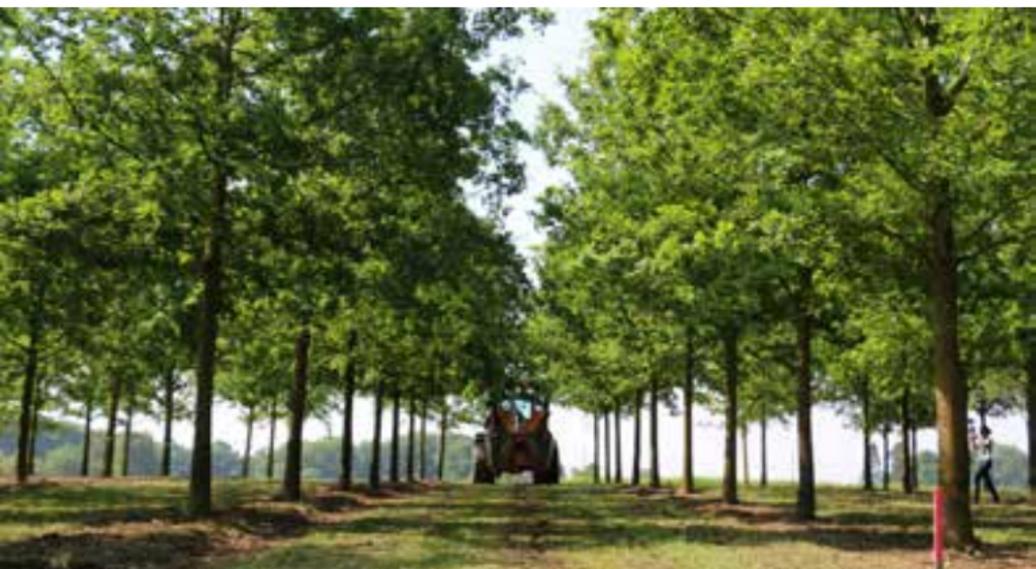

We also offer a large selection of native shrubs. The Lorenz von Ehren tree nursery has been awarded the highest grade of the ZgG (Certified Native Shrubs). And we take responsibility when it comes to the environment too: our company has been acclaimed by the environmental programme "Ökoprofit" for its sustainable production methods.

We are proud to be able to offer you the best quality and the most environmentally friendly products in the world with our plants.

Production lines

Our planting strategy is determined by the different soils and climates at our production locations in Hamburg and Bad Zwischenahn.

In Hamburg, we mainly grow avenue trees and large trees, fruit trees and shrubs. You will also find our rare plants, feathered trees and our carefully selected city trees there. In Bad Zwischenahn our production focus is on evergreens and topiary. Both locations have something in common: we use the resources of soil and water sparingly. Our plants are grown over a number of years, so that you can use them with a clear conscience and know that they will play their part in protecting the environment at their new location.

And if you would like to plant in summer, our container plants make it possible. If you make a timely reservation, we will lift the plants for you and prepare them for summer delivery.

Unique specimens

Looking for a plant with character?

In our "Unique specimens" range, you will find trees with unmistakable personalities, which stand out because of their stature and impressive age. And of course there is only one of each!

Whether you are searching for a fruit tree or a large bonsai, a giant tree or an impressive multi-stemmed solitary tree, they all fulfil all the criteria to take the starring role at their new location.

You can find an overview of all the available unique specimens in the Lorenz von Ehren brochure, which is updated every year, or on our website.

If you are interested, we would be happy to discuss our range of unique specimens with you!

City trees for the future

If you have over 150 years of tree nursery experience, as we do, you acquire plenty of knowledge and expertise. For us, it's an incentive to be even better in the future. That's why we've been supporting science and research projects for many years. Currently in focus: the city trees of the future. This will allow us to have a clear conscience and confidence to be able to offer trees which will withstand heat, frost and climate fluctuations.

New to the nursery is our "climate tree copse". This is where we have planted our climate trees. They are the exception to our usual rule and are not transplanted every four years. This makes it easy for you to visualise the trees' habit.

If you would like to find out more, or view the "climate tree copse", we are happy to share our knowledge with you!

From the tree nursery to the customer

Year after year, over 1.5 million Lorenz von Ehren plants are delivered to their new locations.

Whether it's to Germany or somewhere else in Europe, we deliver punctually and directly to site.

By arrangement, you can also pick up your plants from us at our locations in Hamburg, Bad Zwischenahn and Rellingen. No matter how tight is your schedule, you can rely on us.

We are happy to help you!

For us, the customer is our focus. Whether it's a large project or a single tree, a public green space or a private hideaway, we take time to help you select the plants you want. Our tree nursery experts are happy to advise you at any time when choosing plants and will answer any plant-related questions you may have.

You can find our extensive selection of plants in the Lorenz von Ehren catalogue or on our website – and of course at the tree nursery directly. We are looking forward to your visit!

Full Service

What you can expect from us ...

- Rapid information on prices and availability
- Competent advice on plant-related topics
- Preparation and support for your visits to the tree nursery, together with your clients if desired
- Delivery of a complete selection of plants from a single source
- Tips and techniques for handling large plants
- Support with complex planting projects
- The optimal logistical solution for your needs
- Information on trends and news from the horticultural sector

... and all of this not just from "9 to 5"!
